European and global gateway

Piemonte is strategically positioned at the heart of the European development system, right at the crossroads of the main routes between the North-South, East-West. As part of the European Union, companies located in Piemonte have duty free access to more than 30 national markets within the European Economic Area and to the world's richest consumer market of 500 million people, over 330 million of whom work in the single currency.

Italy is Europe's 2nd largest manufacturer and in the last 30 years has always ranked in the World's Top 10 Manufacturers. Piemonte has strongly contributed to this success, demonstrating to be one of the manufacturing engines of Europe. It produces about 8% of Italy's national wealth, and its production system has reached high levels of excellence and tertiary sector expansion. Piemonte is a promising and competitive business area. The region is as dynamic in industry as in services, with a skilled, flexible and versatile workforce.

PIEMONTE IS LIFE SCIENCES

Engaged in life, engaged for life

In Italy, life sciences - specifically biotechnology, pharmaceuticals and medical devices - represent one of the most promising hi-tech industrial sectors with a significant growth potential in the medium to long term. Piemonte is playing a pivotal role at the national and international levels. It is featured by a top public healthcare system endowed with first level know-how: Piemonte ranks 1st in Europe in Organ Transplantology and excels in the fields of Oncology and Cardiology. Its super performing academic system is headed by the University of Torino and University of Eastern Piemonte, both leading institutions in all medicine-related departments, technology development as well as research: together with Politecnico di Torino they offer an efficient academic nucleus closely interlinked with the entrepreneurial environment and guarantee top class innovation and technology transfer. On top of this, the Regional Technological Platforms and the Innovation Hubs are drivers of innovation and research programmes involving the public system, big players and companies: successful results in terms of new medical applications, diagnostics, medical sensor technology and automation arise from this efficient cooperation. Last but not least, Piemonte boasts a fertile and diversified industrial backbone, where traditionally strong sectors are developing new technologies and remedies: more precisely Piemonte's agrifood sector is more and more involved in the nutraceutical field as well as mechatronics, robotics and ICT companies are focusing on new qualifying equipment and solutions. In Piemonte, the network of research centres, multinational companies and SMEs, is a cluster of innovation, education and technology transfer and is the core of a robust, interlinked system active in pharmaceuticals, biotechnology, wellness and health massively supported by converging technologies. In particular, within the biotechnology field, the technological inclination of Piemonte's R&D is in areas such as cell and molecular technologies, molecular diagnostics and molecular and traditional imaging.

Piemonte ranks high in Europe as a strategic partner for cooperation, R&D and investments in the life sciences and converging technologies sector, making the region a powerful location for scientific and industrial partners and for new businesses to set up operations.

PRIVILEGED POSITION

Piemonte counts on its strategic position right in the heart of one of the most dynamic biotech areas in Europe. Its proximity to other highly developed European regions, such as Lombardia in Italy, Rhône Alpes in France and the Geneva-Lausanne region is yet another plus

for Piemonte: the region is located in the heart of this macro-area and is increasingly viewed as an international point of reference for widespread, synergic and shared development in the life sciences and healthcare sectors.

A COMPLETE AND INTEGRATED LIFE SCIENCES SYSTEM

The R&D ecosystem

First in Italy in terms of capacity for collaboration between universities and industries, Piemonte is highly active in the development of research projects in different technological fields thanks to a dense hub of public institutions, universities, research organisations (public, private and in partnership), CNR (National Research Council) research institutes, professional associations, higher training centres, private and public foundations and a close network of enterprises, from innovative start-ups to SMEs and multinational groups.

Piemonte universities carry out international scientific research programmes and projects and are main drivers for the development of the ecosystem in the region. Universities have integrated interdisciplinary competences within centres focused on specific fields applying a converging technology approach.

The Piemonte public health system offers a robust, high quality service organized into 3 major public hospitals, 3 University research and teaching hospitals, more than 70 health walk-ins organised into 12 local health areas (ASL) with nearly 60,000 workers and more than 20,000 beds. Complemented by and in collaboration with IRCCS (Research and Health Service Institutes), centres of excellence and specialised networks, both national and international, Piemonte's public and private healthcare system goes a step beyond the ordinary activity with cutting-edge research and initiatives and offers the possibility to conduct clinical trials in connection with research institutions.

Research Institutes, Foundations and Interdisciplinary Centres

UNIVERSITY OF TORINO – MOLECULAR AND PRECLINICAL IMAGING CENTRES

The University of Torino is very experienced in the field of medical imaging both preclinical and clinical and has a long experience in the synthesis and physical-chemical characterisation of contrast agents specifically for applications in life sciences research and diagnostics. In 2001 the fruitful collaboration between chemists, biologists and medical doctors led to the foundation of the Centre for Molecular Imaging (CIM - www.cim.unito.it). CIM has been selected for hosting the hub for in vivo/Medical Imaging of the EU Infrastructure Euro-BiolMaging. Since 2009 it hosts a research unit of the Institute of Biostructures and Bioimages (IBB) of CNR and since 2016 it coordinates the activities of the Euro-BiolMaging (www.eurobioimaging.eu) multi-sited "Multi-Modal Molecular Imaging Italian Node" (MMMI) (www.mmmi.unito.it). In 2004 the Clinical and Experimental Centre for Functional Magnetic Resonance Imaging (CCS-fMRI) (www.cim.unito.it/website/research_CCS_fMRI.php) was set up: it is dedicated to clinical and experimental neuroscience research.

The Molecular Biotechnology Centre (MBC) (www.mbc.unito.it) pursues an interdisciplinary approach to biomedical research and is actively involved in biotechnological research in the field of biomedical sciences, with specific focus on the study of the molecular mechanisms at the basis of physiological pathological processes that have a great impact on human health, such as cardiovascular diseases, inflammation, cancer and stem cell biology.

The MBC hosts: the IIGM-Italian Institute for Genomic Medicine, the Centre for Molecular Imaging (CIM), the Centre for gene transfer, the Centre for the production of recombinant proteins and antibodies, the Centre for Bioinformatics and the Stem Cell Centre - dedicated to clinical applications. It also hosts the Technology Transfer Centre which fills the gap between academia and industry by building relationships with biotechnology companies. The MBC is expanding its headquarters in a new building.

www.unito.it

UNIVERSITY OF EASTERN PIEMONTE – INTERDISCIPLINARY AND INTERDEPARTMENTAL CENTRES

The University of Eastern Piemonte founded in 2002 the Interdisciplinary Centre for Research on Autoimmune Diseases (IRCAD – www.diss.uniupo.it/ricerca/centri-interdisciplinari/ircad) to develop basic and applicative

research aimed at studying the mechanisms that cause autoimmune diseases and the development of new diagnostic tests and new therapeutic approaches, with interdisciplinary collaboration with specialized laboratories. www.uniupo.it

POLITECNICO DI TORINO - INTERDEPARTMENTAL CENTRES

The Politecnico di Torino has embraced the challenge to transform from occasional to systemic the interdisciplinary collaboration in life sciences between different technological and scientific fields. Some examples of Centers involved in these research areas:

- the Laboratory for Engineering of the Neuromuscular System (LISiN) (www.lisin.polito.it), a research laboratory of the Department of Electronics and Telecommunications, a reference for the study of the neuromuscular system in the world.
- the PoliToBIO Med Lab, which creates a platform where scientific experts from Politecnico cooperate with bioengineers who have in-depth knowledge of their subject and a professional multidisciplinary approach. The Center's objective is to develop research and innovation activities in order to tackle the social challenge of promoting the health and wellbeing of all citizens throughout their entire life.

www.polito.it

THE CANDIOLO CANCER INSTITUTE

It is a private non-profit institution, recognized as IRCCS (Research and Health Service Institute) by the Italian Ministry of Health. It is a biomedical and clinical research centre entirely devoted to the study and the treatment of cancer through cutting-edge scientific research and clinical practice. With more than 100 international researchers, its mission is translational medicine, i.e. to transfer experimental preclinical information into clinical practice, bridging the gap between basic and clinical research. The Institute houses one of the five Italian Centres for Advanced Scientific Research established in 1997 by the G. Armenise - Harvard Foundation, devoted to the study of signal transduction in normal and cancer cells.

www.ircc.it

THE NATIONAL RESEARCH COUNCIL - CNR

It offers a set of R&D laboratories located in 5 different interdisciplinary Institutes (ISMAC, IBB, IPSP, ISPA IEIT), with more than 170 researchers, specialized mainly in medical imaging, phytovirology, proteomics and agri-food, immunogenetics, oncology, mycology, robotics and bioengineering.

www.area.to.cnr.it

THE ITALIAN INSTITUTE FOR GENOMIC MEDICINE (IIGM)

It sustains and boosts advancement in human genetic research and in education, with a priority focus on genomic variability in multifactorial genetic pathologies. IIGM, occupies a single facility, located at the Molecular Biotechnology Centre (MBC). According to an innovative organization model, it integrates molecular, cellular, developmental and population genetics, combining theoretical approaches and state-of the art technological platforms. The key research topics at IIGM are: molecular and genetic epidemiology, genetic variability in human population, immunogenetics, epigenetics and computational biology

www.iigm.it

THE BIOTECHNOLOGY FOUNDATION OF TORINO (FOB)

It is dedicated to disseminating knowledge, stimulating education and supporting research in the field of biotechnology with regard to health services, agriculture, nutrition, environmental protection and conservation and the protection and conservation of cultural heritage.

www.compagniadisanpaolo.it/eng/Major-Projects/Torino/Fondazione-per-le-Biotecnologie

THE ISI FOUNDATION

The ISI (Institute for Scientific Interchange) is a private foundation developing scientific research in the field of international cooperation, encouraging the creation of research groups and innovative and interdisciplinary laboratories, with particular attention to the science of complex systems.

www.isi.it

THE NEUROSCIENCE INSTITUTE CAVALIERI OTTOLENGHI FOUNDATION (NICO)

It performs research in the field of neuroscience by combining the study of normal structure and function of the nervous system, the related pathological and degenerative processes as well as mechanisms of regeneration and repair with a specific interest in prevention, diagnostics, and cure of neurological disorders.

www.nico.ottolenghi.unito.it/

THE NIT- NEUROSCIENCE INSTITUTE OF TORINO

It promotes and runs experimental, theoretical and applied research in the field of the neurosciences, from the study of the cellular and molecular bases of the nervous system to the analysis of advanced integrative and mental activity functions, in normal and pathological conditions.

www.centronit.unito.it

The City of Science and Health of Torino is one of the biggest teaching and research hospitals in Europe. On 1st July 2012 a regional act unified the four important regional hospitals in the Torino Area and put the basis for the New Teaching and Research Hospital: this is a project of strategic international relevance for the life science and health sectors that will further cast Piemonte on the global community scene.

The New Teaching and Research Hospital project in **Torino** foresees high quality care and teaching integrated with the healthcare system. It foresees the **creation of 4 functional centres**, all closely interconnected:

1. Healthcare and Clinical Training Centre: 127,000 sqm, of which 5,000 sqm are dedicated to clinical training, and a total capacity of 1,040 beds
2. Research centre: 10,000 sqm designed for about 1,000 people and shared by teachers, assistants, doctoral students and auxiliary staff
3. Teaching centre: 31,000 sqm designated for one-cycle master degree programs, three-year degree courses and specialist degree courses in medicine or health professions for a total of 5,000 students
4. Residential centre: 8,000 sqm offering short-term accommodation for temporary guests working or involved in activities in one of the centres (190 places) and for the discharged patients that still need temporary low-intensity care (30 places).

Incubators

I3P

It is a non-profit, joint stock consortium company that manages the Incubator for Innovative Companies of the Politecnico di Torino, which promotes and supports the creation of hi-tech enterprises, building on the innovative potential developed in research institutions across the territory.

www.i3p.it

2I3T

It is a consortium company that manages the technology incubator of the University of Torino, specialised in the chemistry-pharmaceuticals and biotechnology fields, providing start-ups with equipped labs and cutting edge shared facilities.

www.2i3t.it

ENNE3

It is the enterprise incubator of the University of Eastern Piemonte located in Novara promoting and developing technologically innovative business projects, with particular attention to the territory of Eastern Piemonte.

www.enne3.it

Seed capital companies

INNOGEST

It is a seed and venture capital fund supporting the most promising Piemonte-based medtech companies

www.innogestcapital.com

INVESTORS CLUB

It is an association of more than 150 entrepreneurs, professionals and managers who invest in innovative start-ups and small businesses with a high potential of growth.

www.clubdeglinvestitori.it

Piemonte Health & Wellness is a special project promoted by Regione Piemonte, financed by ERDF – European Regional Development Fund and managed by Piemonte Agency, providing international players a free preferential channel to meet and start business with top class aerospace selected enterprises based in Piemonte, Italy. The Team makes an assessment of buyers' needs and technicians' requirements from all over the world and provides them with:

- top class skills and unique manufacturing know-how
- capable suppliers who can deliver on time high-quality parts and products at competitive prices
- technologically qualified and competitive supply chains sharing commercial objectives, target clients and strategies
- technical working groups where local enterprises and foreign companies work together to develop projects aligned to the expectations of their international players.

The project Team's assistance is supply chain focused and completely free of charge.

Regional policy for smart, sustainable and inclusive growth

INTEGRATED SUPPLY CHAIN PROJECTS ARE CO-FINANCED WITH EUROPEAN REGIONAL DEVELOPMENT FUND

The converging technologies

The remarkable skills existing in Piemonte in sectors such as ICT, electronics and nanotechnologies - considered converging technologies - have favoured the development of significant results and expertise in bioinformatics, diagnostics, data sciences and biomedical equipment, micro and nanotechnologies. This synergy reaches the innovation ecosystem in interdisciplinary fields.

Moreover, several technological platforms already operating in the territory, such as automotive, aerospace, food farming, biotechnology and new consolidating ones, such as smart manufacturing, nanotechnologies, Internet Of Things, further bolster a converging technologies approach into life science sector.

Here are some actively involved R&D centres and institutes:

LATEMAR

It is a Centre of Excellence funded by the Italian Ministry for Education, University and Research for public and private research facilities operating in strategic fields. It is an extensive laboratory coordinating basic research on the development of micro and nano-devices and sensors for genomics and post-genomics, in order to produce innovative materials, devices and characterization techniques for diagnostics and therapeutics in collaboration with R&D centres of highly qualified companies.

www.latemar.polito.it

NIS

The NIS (Nanostructured Interfaces and Surfaces Interdepartmental Centre) operates in the field of nanotechnologies of surfaces and interfaces and their

technological application, with a special focus on energy, sustainability of industrial processes, environment, cultural heritage and healthcare. It aims at bringing together multidisciplinary expertise (in the fields of chemistry, physics, biology, mineralogy) and the promotion of research, training and technological transfer activities.

www.nis.unito.it

INRIM

The National Institute of Metrological Research is a public research centre focused on the development of the metrological science in the fields of biomedical applications, food, environment and energy to meet Italy's needs for its citizens' wellbeing and its environmental protection. A major sector is biomedical metrology, specifically with research projects on traceable measurements and mathematical models in the field of medical physics and biomedical sciences, including nanomedicine, the preparation of tissue mimicking materials, diagnostic quantitative MRI and the diagnostic and therapeutic techniques on micro and nanoscales.

www.inrim.it

ISBM

Istituto Superiore Mario Boella is a research and innovation centre operating in the ICT domain. It also focuses on interdisciplinary strategic programs: smart energy, smart city and smart health. In cooperation with health care institutions and experts, ISMB is testing new solutions for personalized (PHS) and preventive healthcare, with a focus on remote monitoring, health-related data collection and presentation models, and support to the caregiving processes.

www.ismb.it

Technology transfer and business enhancement

Piemonte has an integrated system of 4 science and technology parks and 7 Innovation Clusters. Together with the business incubators, they are an essential part of the regional system of innovation and technology transfer. In addition, the Health and Wellness Regional Technological Platform promoted by Regione Piemonte in the framework of the ERDF – POR 2014 – 2020 develops noticeable innovative projects and research programmes for almost € 50 million investment supporting cooperation among the public system, local companies and international players.

BIOINDUSTRY PARK SILVANO FUMERO

It promotes and develops research in the biotechnology, healthcare and life science sectors. Fully operational since 1998, the Park is a driver for growth and a regional point of reference for businesses related to the life sciences and health. It is member of the ALISEI - Advanced Life Science in Italy (www.clusteralisei.it), the Italian technology cluster set up to encourage interaction in the health sector between research institutions, business and public sector bodies. The Park directly coordinates the fulfilment of investments and management of the technical equipment, supports the implementation of R&D projects in the on-site companies, encourages the development of start-ups and spin-offs; provides infrastructures as well as scientific and advanced services, such as technology transfer, patent support, tutoring of start-ups and spin-offs, project management and financial support.

The Bioindustry Park community includes organizations, international partners and a top-level European cluster: 42 entities including 5 Corporate companies, 30 SMEs, 4 Research centres, 2 Associations and 1 Foundation are all hosted on campus premises. The pharma company Bracco Imaging has set up its own Research Centre in the Park, a unique facility in the Italian life sciences industry. www.bioindustrypark.eu

BIOPMED

It is the Innovation Cluster for Biotechnology dedicated to healthcare related products and services. Established in 2009 by Regione Piemonte as part of the 2007-2013 POR-FESR programme, it is led by Bioindustry Park, which received the award *Gold Label for Cluster Management Excellence* by the European Secretariat for Cluster Analysis. It brings together companies, research centres, universities and foundations active in the fields of human health and life sciences, to promote the interaction between research and industry, stimulate innovation and accompany internationalization processes to improve company business and the competitiveness of the regional system. The Cluster provides dedicated funding for research projects and feasibility studies, specialized highly added value services and international professional networks to favour the convergence of public investments and individuals on common development trajectories. www.biopmed.eu

The Regione Piemonte has allocated € 1 billion to promote the growth and competitiveness of the whole territory within the Regional Operational Programmes (ROP) of the European Social Fund (ESF) and the European Regional Development Fund (ERDF).

Notably the ROP ERDF 2014/2020 represents the main financial source of the region's industrial policy which aims to achieve 3 main objectives: to maintain and enhance the existing industrial activities, to expand investments of the companies already active on the territory, to attract new businesses wanting to realise innovation and industrial development projects. All the regional incentives can be granted through a preliminary evaluation process managed by Finpiemonte (the regional holding company for the socio-economic development of the territory), which coordinates the procedures related to the assignment, delivery and monitoring of the subsidies promoted by Regione Piemonte and financed by European, national, and regional funds.

Piemonte is the 1st Italian region to have established a regional Agency dedicated to inward and outward investment

1st Italian region to have created a dedicated financial tool for attracting and financing foreign companies willing to locate in Piemonte: the Regional Investment Contract.

Funding for **R&D**

- Setting up and strengthening labs and research centres
- Creating and developing start-ups
- Technology transfer from research to SMEs through Innovation Clusters
- Collaborative research on major challenges through Technological Platforms: Intelligent Factory, Life Sciences, Bioeconomics, Aerospace, Automotive
- Supporting industrialisation of research results (IR2 Call), through relevant investment programs aimed at industrializing the results of R&D activities already partially acquired

BUSINESS MINDSET

With a long tradition in industrialisation and innovation, Piemonte has recently launched the Smart Specialisation Strategy (the Strategy – S3), in the framework of the Cohesion Policy 2014-2020 and the Europe 2020 Strategy. The main goal of the Strategy is to strengthen the R&D system as one of the main pillars to foster entrepreneurial explorations in the most promising sectors. The Strategy aims to transform the traditional industrial sectors through the discovery of emerging and new sectors supporting new ideas, products, services and models in order to give new answers to social needs.

The subsidy system in Piemonte focuses on both the start-up of new initiatives and on the development of existing companies.

The subsidies, which can take the form of soft loans, non-repayable grants or free-of-charge guarantee support to companies according to the European regulation on state aid and can vary according to the type of beneficiary, the kind of investment and the nature of expenses.

The system is one of the richest and most effective among the European developed regions, addressing to all the relevant industrial sectors, focusing in particular on research and innovation, manufacturing, sustainability and energy efficiency. The broad panorama of official sources and subsidised tools allows Italian and foreign businesses to cover the various stages of growth and development.

Piemonte Agency

To come to know about the local economic system, to get information on business opportunities in the area and to find a quality destination for direct investment, the Regione Piemonte offers an entry point: Piemonte Agency, the one-stop-shop to get in touch with Piemonte.

THE AGENCY PROVIDES A COMPLETE RANGE OF FREE SERVICES TO FOREIGN COMPANIES:

- wishing to locate in Piemonte
- searching for suppliers and partners in a variety of sectors
- needing technical training on foreign trade

THE AGENCY IS A RELIABLE PARTNER THAT GUARANTEES:

- responsive and tailored assistance at all stages of the investment project
- matchmaking of the regional production offer with the needs expressed by international markets
- targeted activities to connect highly qualified local companies with foreign partners
- training in the field of internationalization
- international cooperation projects

Piemonte Agency guarantees complete assistance to foreign companies willing to invest in Piemonte.

Piemonte Agency can advise on every aspect of starting and running a business in Piemonte, providing assistance at every stage of the project. In addition, the Agency acts as a liaison office between foreign investors and Public Authorities, academic/research networks, industry. Foreign companies interested in establishing a presence in Piemonte can find several investment opportunities such as R&D centres, M&A operations, technical partnerships and/or greenfield operations.

Services for investors

BUSINESS ASSESSMENT

- Insights on economic and industrial climate and key industries
- Market data and tailored information to launch your business
- Selection of potential partners
- Identification of service providers
- Detection of R&D projects and opportunities
- Identification of funding schemes, incentives and grants programmes, legal/labour/tax procedures

BUSINESS SET UP

- networking with the local institutions, R&D networks, science and technology parks, innovation centres and universities
- support in obtaining authorisation, visas and permits
- advice on legal, financial and corporate structure in cooperation with the partner network
- selection of grants and incentives in cooperation with the partner network
- site selection and site visits
- help in recruiting specialised personnel onsite

LOCATION OPPORTUNITIES DETECTION

Piemonte Agency performs real-estate selection and organises tailor-made visits.

IDENTIFICATION OF INCENTIVES & GRANTS

Piemonte Agency provides help in identifying the most appropriate available incentives and grants for your business.

Divided by framework of application, appropriately combined, the incentives are able to cover the entire range of business investment expenses:

- start-up
- investments in machinery and plant
- equipment
- hiring and training of personnel
- research and development

The service is provided in collaboration with the Regional Government and Finpiemonte.
